ABOUT US

Founded by Akash Bade, Mushroom Seed Nepal and Research Center is a significant organization in Nepal's mushroom industry, headquartered in Madhyapur Thimi, Bhaktapur, Nepal. We specialize in producing high-quality mushroom spawn, advancing modern cultivation techniques, and conducting cutting-edge research in the field of mycology. With a strong focus on farmer empowerment and support, we provide cultivators with premium quality mushroom seeds and offer hands-on training covering various species and aspects of mushroom farming.

Committed to sustainable agriculture, Mushroom Seed Nepal and Research Center aims to address both food security and nutrition challenges through innovative approaches to mushroom cultivation. Notably, we are Nepal's first organization to successfully cultivate Reishi mushrooms (*Ganoderma lucidum*) on a commercial scale, marking a pioneering step in Nepal's medicinal mushroom sector.

We stand today with the objectives:

- Empower mushroom cultivators.
- Uplift Nepal's mushroom industry.
- Provide quality seeds.
- Offer premium mushroom products.
- Deliver comprehensive training.
- Provide practical knowledge to students.
- Conduct mushroom research.
- Promote mushrooms in Nepal.
